DAY IN THE LIFE:
Commercial Lawyer

How Bonfy ACS™ Protected a Fortune 500 Law Firm from a Major Error

Emma, a seasoned commercial lawyer at a prestigious law firm serving Fortune 500 companies, is known for her meticulous attention to detail. Her latest task is creating an agreement for her new corporate client, who is represented by John Taylor, General Counsel.

To draft the complex agreement, she relies on Copilot for Microsoft 365, a sanctioned ChatGPT, her extensive legal and business knowledge, peer reviews, and a repository of past similar client agreements.

It was a busy afternoon as Emma was finalizing the crucial document. In her haste, she didn't notice that a "limitation of liability" clause from a market-moving M&A transaction of another client had been added to the agreement. Unaware of this error, Emma prepared to send the document to John Taylor. However, in her rush, she mistakenly addressed the email to John Trevor, another client's general counsel.

Fortunately for Emma and her firm, Bonfy's adaptive content security solution, Bonfy ACS™, had been installed in the last few months. Bonfy ACS is a sophisticated AI-based tool designed to use business logic and context to scan emails for potential content risks before they are sent outside the organization.

As Emma hit send, Bonfy ACS seamlessly scanned the email and flagged the problematic clause and the incorrect recipient. Within moments, Emma received an automated reply from Bonfy ACS, detailing the issues with her email. The system had detected a reference to the other client in the limitation of liability clause and identified that the recipient was the wrong John. Thanks to Bonfy ACS, the email transmission was halted, preventing a potential breach of confidentiality and a significant professional blunder.

KEY TAKEAWAYS

AI-Powered Error Prevention: Bonfy ACS™ uses advanced AI to scan emails for potential content risks, preventing errors like sending sensitive information to the wrong recipient and including incorrect clauses.

Enhanced Security and Compliance: The system flagged a problematic clause and incorrect recipient, halting the email transmission and preventing a breach of confidentiality, thus ensuring compliance with legal standards.

Continuous Improvement and Trust: The incident was recorded for future monitoring, helping to prevent similar issues. Emma's firm trusts Bonfy ACS™ for providing essential protection in high-stakes legal work.

Relieved, Emma corrected the document and ensured it was sent to the correct John. This incident was recorded for future monitoring, helping to safeguard against similar issues in client communications. Emma's firm continued to trust Bonfy ACS' solution, knowing it provided an essential layer of protection in its high-stakes legal work.

ABOUT BONFY

Bonfy.AI's adaptive content security solution, Bonfy ACS™, ensures your organization's content is always safe and compliant, instilling confidence and trust. Acting as a guardian AI, our solution analyzes both GenAI-generated and human-created content, detecting and preventing risks related to cybersecurity, privacy, regulatory compliance, IP protection, business liabilities, and reputational exposures.

Unlike traditional DLP solutions, Bonfy ACS is purpose-built for the unique challenges and exposures posed by GenAI, such as breaking trust and information silos, leaking customer information and intellectual property, violating compliance requirements, and the loss of record integrity. Its AI-enabled technology, leveraging business context and business logic, accurately detects risks in any content and does not rely on error-prone pattern matching, pre-labeled information, or generic classifiers to identify risk. With its modern design, very high accuracy, and out-of-the-box policies, Bonfy ACS delivers quick time to value. By augmenting or replacing DLP and other unstructured data security tools, Bonfy ACS significantly lowers the total cost of ownership (TCO) by reducing the propensity for false positives or negatives and the time and resources spent on investigating and resolving security alerts.

Trusted by regulated and risk-conscious organizations, Bonfy mitigates business risks and ensures compliance with regulatory requirements and internal policies. We empower organizations to leverage GenAI innovations confidently, knowing their content is secure and trustworthy.
